

Go beyond the model. Scale your risk strategy.

LUMI7ERO

Connect trusted @RISK simulations to enterprise-wide governance.

Gain end-to-end risk management—without giving up the tools you trust. With Predict!, your team can manage risks in a centralized, auditable platform while continuing to simulate in @RISK. Build models with one click, run your analysis in Excel, and push results back into Predict! for structured reporting and enterprise visibility.

Why @RISK + Predict!

Extend the value of your @RISK models by connecting them to portfolio-level oversight. With Predict!, your simulations integrate into governed risk processes, feeding structured registers and decision-making across programs and projects.

Key benefits

Centralized risk register

Manage risks in one governed platform—assign, update, and track in real time.

Seamless integration

Export and import data between Predict! and @RISK in seconds—no model rework required.

Accelerated analysis

Generate simulation-ready cost risk analysis models—saving hours and eliminating errors.

Enterprise-ready insights

Push key results into Predict! to power dashboards, reporting, and executive-level visibility.

From register to results— one connected process

Centralize:

Import existing risk data into Predict!'s structured risk registers.

Build models:

One-click export generates @RISK-compatible models—formulas and formatting included.

Simulate:

Run cost risk analysis models in @RISK with the same models, workflows, and confidence you trust.

Deliver insights:

Transfer key summary results like confidence intervals and means back into Predict!.

Present:

Turn analysis into action with audit-ready dashboards that highlight strategic value.

Key outcomes

Increased efficiency

Eliminate manual @RISK model setup to quickly move from analysis to action.

Enhanced risk visibility

Share simulation results across teams and leadership with enterprise-ready reporting.

Stronger governance

Maintain audit trails, data consistency, and mitigation tracking across all projects and portfolios.
