RIB | CX

Intelligent Construction Project Management Software

Simplify collaboration.
Streamline compliance.
Build with confidence.

RIB CX Overview

Previously known as Project Centre and first developed in Sydney in 1997, RIB CX is a comprehensive construction project management platform designed to streamline communication, manage project documentation, and maintain quality across all phases of construction. With modules for correspondence, document control, tenders, contracts administration, quality control, and defect management, RIB CX empowers project teams to stay connected, reduce risk, and deliver projects more efficiently. By centralising data and enabling real-time insights, CX provides the visibility and control needed to drive project success from planning & design to delivery & handover.

How RIB CX Delivers Efficient Project Management

Centralised Collaboration

Connect all stakeholders in a single source of truth for greater transparency and accountability.

End-to-End Visibility

Gain real-time insights into project performance, documentation status, and compliance—across every phase of the project lifecycle.

Enterprise-Grade Security

Protect your data with Microsoft Azure hosting, role-based access controls, encryption protocols, and regular backups. Suitable for Government and Defence projects.

Configurable Workflows

Streamline key processes with custom forms, approvals, and workflows tailored to your unique project requirements.

Built for Mobility

Empower field teams with mobile access to tasks, drawings, inspections, and reports - whether on-site or in the office.

Audit-Ready Compliance

Maintain a clear, traceable history of decisions, actions, and approvals with built-in audit trails. Everything is organised and streamlined for handover, making the process efficient and stress-free.

RIB CX Unique Advantages

RIB CX Building Blocks

At the heart of RIB CX is a flexible set of building blocks - SmartForms, Metadata, and an Automation Engine - that power every module across the platform. Changes to forms, workflows, and dashboards are applied automatically system-wide, ensuring consistency and saving time. With the Modern Forms Editor, teams can easily manage their own updates - making customisation simple and scalability effortless.

Smart Forum-Based Technology

RIB CX replaces fragmented communication with its smart, forum-based technology. Easily identify collaborators, status updates, correspondence and associated documents on a single form. A full audit trail is just one click away making the handover process seamless and automated.

More Configuration Options

Customers can design their own template, imbed sequential workflows, manage permission controls and add reportable fields as needed. This flexibility provides our customers with more control, more automation and meaningful real time reporting to make better decisions in a timely manner.

Locally Hosted and Supported

Rest assured that your data is locally hosted, managed and supported by our team in Australia. Our customers benefit from our dedicated Account Management and Customer Success teams ensuring a smooth implementation and after sales support. We partner with our customers to ensure their business goals are met, and that RIB CX evolves with the ever changing industry requirements .

RIB

The RIB CX Value Proposition

Efficient Communication + **Real-Time Visibility** + **Data Insights & Automation**

= **Stay On Time & On Budget**

Maximise Efficiency and Minimise Risk

RIB CX - End to End Solution

Managing all your processes across the project lifecycle | A single source of truth for all project stakeholders

Communication	Document Control	Procure to Pay	Quality Control	Handover

PLANNING & DESIGN	DESIGN	PRECONSTRUCTION	CONSTRUCTION	DEFECTS & LIABILITY

Developer | Consultants | PM | General Contractor | Suppliers/ Vendors | Sub-Contractors

RIB

Choose What You Need With RIB CX's Modular Platform

Module	Description
Correspondence	Centralises all project communications using form-based technology, ensuring all stakeholders stay informed and aligned.
Publication Space (Document Control)	Provides secure, user-based permissions access to project documents, with version tracking to ensure accurate, up-to-date information is shared across teams.
Tenders (Procurement)	Simplifies the tendering process by managing bids, quotes, and supplier communications in one place.
Contracts Administration	Streamlines contract administration with tools for tracking variations, approvals, and budget impacts.
Quality	Ensures consistent quality standards through digital ITPs, inspections, and compliance tracking.
Defects	Captures, tracks, and resolves defects efficiently, reducing rework and project delays.

Who Benefits from RIB CX?

Project Managers

CX provides a cloud-based platform for centralised communication, so project managers can easily coordinate tasks, track progress in real-time and mitigate risks effectively.

Quality Managers

CX provides a centralised system for managing digital ITPs, inspections, and non-conformances, enabling quality managers to streamline reporting and maintain compliance.

Commercial Managers

CX provides tools for tendering, streamlined contract management, and cost tracking, helping commercial managers control budgets and minimise financial risks.

Asset Owners

Gain confidence, transparency and cost certainty. RIB CX helps asset owners protect budgets and add long-term value with efficient project management.

RIB

Seamless Project Management - Anytime, Anywhere

RIB CX Clients

Want to benefit from intelligent project collaboration and control for construction?
