

First Principles Estimating, Planning and Project Controls for the Built Environment

Empower Your Estimating, Perfect Your Planning

From on-screen quantity take-off, estimating and project planning through to final certificate, Candy targets the unique requirements of construction and engineering contractors; providing an interactive link between the bill of quantity (BOQ), estimate and program in one exceptional project management solution.

Avoid Rework

Candy allows you to re-use, repeat and repurpose estimate data and effect changes with ease and assurance. The use of previous estimates for future projects will lead to huge time savings. With Candy you will finish projects faster than ever before.

Data Accuracy & Transparency

Benefit from total transparency. Candy can be the single source of the truth – letting you know where your numbers come from, how they were calculated by whom and when. Confidently and quickly produce reliable and competitive estimates and quotes to submit and win more bids.

Stay on Top of Tasks

Know the complete status of a project now and be able to accurately predict the outcome of the project at each stage of the project. All while providing information at the right level to the right people – allowing for corrective action, where required, resulting in the best outcome and the ability to maximize your profits.

Stay on Budget

By controlling upfront and downstream purchasing as well as productivity, Candy will allow you to accurately identify and manage the procurement quantity and productivity. At the same time, Candy will help keep an eye on budgetary allowances for every resource on the project.

Covered Every Step of the Way

Quantity Take-Off (QTO)

Seamlessly compile bill of quantity information and utilise this data throughout the project.

Estimating

Generate powerful tender and resource analysis data, to use in all stages of the project.

Planning

Plan effectively with access to cash flow analysis and cost/value forecasts.

Cash Flow

Do cash flow analysis on your projects including scenario planning functionality.

Valuations

Full post-tender commercial control including variation and final account management.

Forecasting

Make use of estimating information combined with planning information to dynamically generate forecast quantities, values and resources.

Subcontract Management

Control from adjudication and package award to payment and final retention release.

Cost and Allowables

Earned Value Management with 'cost vs. allowable' comparisons.

A software designed to work the way you think

Advantages of RIB Candy

Improved accuracy, transparency and auditability of estimation and project control

Conveniently combines powerful features into a single-user interface

Fit-for-purpose technology designed by experienced construction industry professionals

Powerful yet user friendly

Confidently and quickly produce reliable and competitive estimates and quotes

Candy is a fantastic estimating tool for large and complicated projects as it contains and controls all aspects of the project, saving time for all parties involved. Candy is the norm for us. There is no job that goes out of this office where Candy is not used.

Allan Widlake, Murray & Roberts Cementation

I have been using Candy for the last 20 years; it is very useful and the most powerful tool for estimating.

Mr. David Ng, Estimating Manager, Laing O'Rourke

Candy is a user-friendly and intuitive tool helping us manage our tenders efficiently, coupled with the professional support and service that RIB CCS offers. We are looking forward to explore other functionalities within Candy soon.

Estimation Team, CEBARCO  Cebarco

AFCONS took a leap of faith a couple of years back when it decided to integrate the Candy software into its system. We started looking for software that wouldn't just calculate tender cost but give a near-accurate analysis of tenders. We wanted it to also give a quick and correct estimation while tendering. We chose Candy from a pool of software and our decision was vindicated. It exceeded our expectations in terms of performance.

Sandeep Desai,
Executive Vice President,
IT & Information Process Group,
AFCONS Infrastructure Limited

Driven by transformative digital technologies and trends, here at RIB we've made it our purpose to propel the industry forward and make engineering and construction more efficient and sustainable.

And through our 60-year industry experience and our truly global footprint of over 550,000 users and 2,700 talents, our vision is to transform our business into a global powerhouse providing innovative software solutions to our core markets - putting our people at the heart of everything we do.

Managing the entire project lifecycle from planning to construction and beyond, the development of our powerful portfolio of software solutions is driven by industry expertise, best practice and a passion to remain at the cutting edge of technology. Ultimately, connecting people, processes and data in innovative ways to ensure our customers always complete projects within budget, on time and to quality, while reducing their carbon footprint.

RIB Software is a proud Schneider Electric company.
