Faster to Deliver with Contruent Enterprise

Capital projects are increasing in size and scope and are being managed under more scrutiny. Owners and contractors are faced with mounting pressure to adopt stringent project cost and earned value management processes for increased project transparency.

Without comprehensive earned value analysis, troubled projects can spiral out of control before anyone recognizes a problem exists. Improved planning, budgeting, change management, contracting and cost control are imperative to reduce project risk and secure on-time, within budget delivery.

What is Contruent?

Contruent is the premier capital project management software solution that empowers owners and EPCs to build large construction projects with precision and speed. Contruent is faster to deliver across the project lifecycle because it integrates cost and scheduling and comes project-ready, out-of-the box with over 25 years of best practices built in. The result is higher accuracy, speed and cost efficiency.

Benefits

With Contruent Enterprise, you get a SaaS-based cloud solution.

Multi-region: Cloud access for organizations around the globe

Simple, Secure Access: Multi-factor authentication and single-sign on to improve security posture

Automated Deployment: Support automated deployment using Infrastructure as Code (IaC)

Improved Performance: Utilize scalable cloud resources

Driving Value Throughout the Entire Project Lifecycle

Contruent Enterprise drives value throughout the project lifecycle from project setup to project closeout.
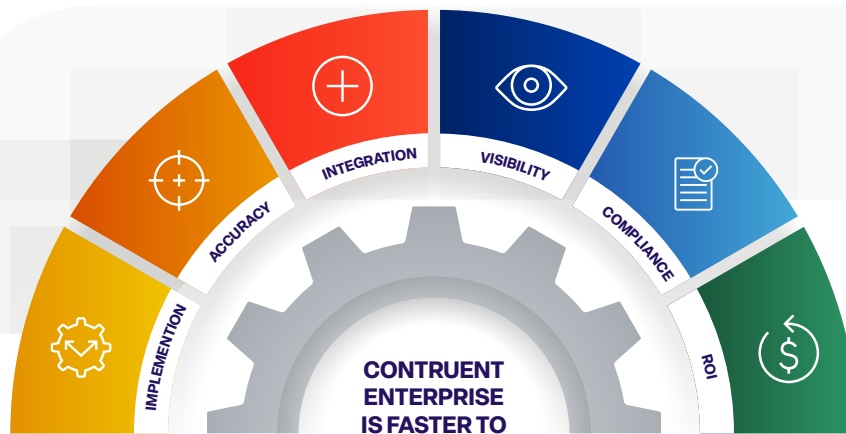

"Contruent Enterprise makes my time more efficient when I've got all the information in front of me. It's a time saver."

Brian Handy
Project Services Manager
