UniPhi Embedded Power BI Dashboard

UniPhi is an award winning, cloud-based Project and Portfolio management system, known for an adaptable software configuration and a user-friendly interface.

My passion and focus revolves around using innovative and disruptive technologies to improve organisations' internal processes and returns. It's my firm belief that in today's diverse work environment, collaboration and transparency are essential to optimise performance and efficiency.

Mark Heath, Managing Director UniPhi

Our software unifies diverse portfolio and project management systems, actively manages the nine key functions of project management, and fosters cross-functional team development, where genuine value is created.

Easily take projects from idea to execution with a clear view of budgets, timelines, and resources. Live dashboards keep you on track.

Easy to use software that connects global teams, ticking off 30% more tasks and boosting productivity. Getting things done - a piece of cake!

Peace of mind without the chaos of juggling multiple apps with centralised tools, data, and communication.

Data Transparency

Open architecture allows to view files, budgets, timelines, resources and other useful data.

Simplicity

Easy to use interface software targeting distributed data capture.

Integration

Connects with various third-party systems, Accounting, CRM and PM systems. Diverse integration and replacement functions.

Creativity

Ideas can be logged as “projects” while our unique lifecycle feature tracks progress.

Delivery

Deliver results faster—without being constrained by traditional Gantt tools.

Innovation

Broadens the conversation to a global scale in a virtual team environment.

UniPhi integrates with all these solutions

UniPhi replaces all these solutions.

Highly Rated Across Multiple Sectors

“On behalf of Drive Engineering, thank you for receiving and actioning our feedback. May our 10+ years of partnership continue, especially with the exciting AI developments UniPhi appear to be researching and developing.”

Karl Rawnsley, Administrator’s Representative at Drive Engineering

“In 2020 we moved our Project Control Group (PCG) report from a manual MS Word template to an automated template in UniPhi. Our Development Managers can now create their draft PCG reports in a fraction of the time it used to take.”

Danielle Parr, former Manager Development Property at Baptcare

“...I loaded up UniPhi on my phone while my colleague who isn’t a believer yet rang the office to ask the director who worked on the job. By the time the call finished, I’d not only advised who the architect was but also the cost of the project, duration for each phase and a host of other questions.”

Cameron Baylis, Director at Turner & Townsend Alinea

“My team and I can rely on UniPhi to support whatever reporting customisation required to achieve the best results for Deloitte PDS Group, particularly the Finance and development teams. By collaborating with UniPhi we have established better reporting, incorporating time saving tools and measures.”

Andrew Buckmaster, Partner at Deloitte PDS Group
