

WE PLAN, MANAGE & CONTROL LARGE COMPLEX PROJECTS

- ✓ Higher certainty of project costs and schedule
- ✓ Improved communications due to higher information quality
- ✓ Less rework and lower costs due to improved output co-ordination
- ✓ Greater control of Design and Engineering fees
- ✓ Greater control and mitigation of risks and change events
- ✓ Removal of turbulence from complex project process
- ✓ More agile decision-making, minimising delays in delivery
- ✓ Earlier completion leading to Operational benefits

SAVING TIME & MONEY

DESIGN MANAGEMENT

Our expertise evolved from managing the complexities of inter disciplinary design and construction. Design Management is at our core, Project Management fundamentals are the foundation.

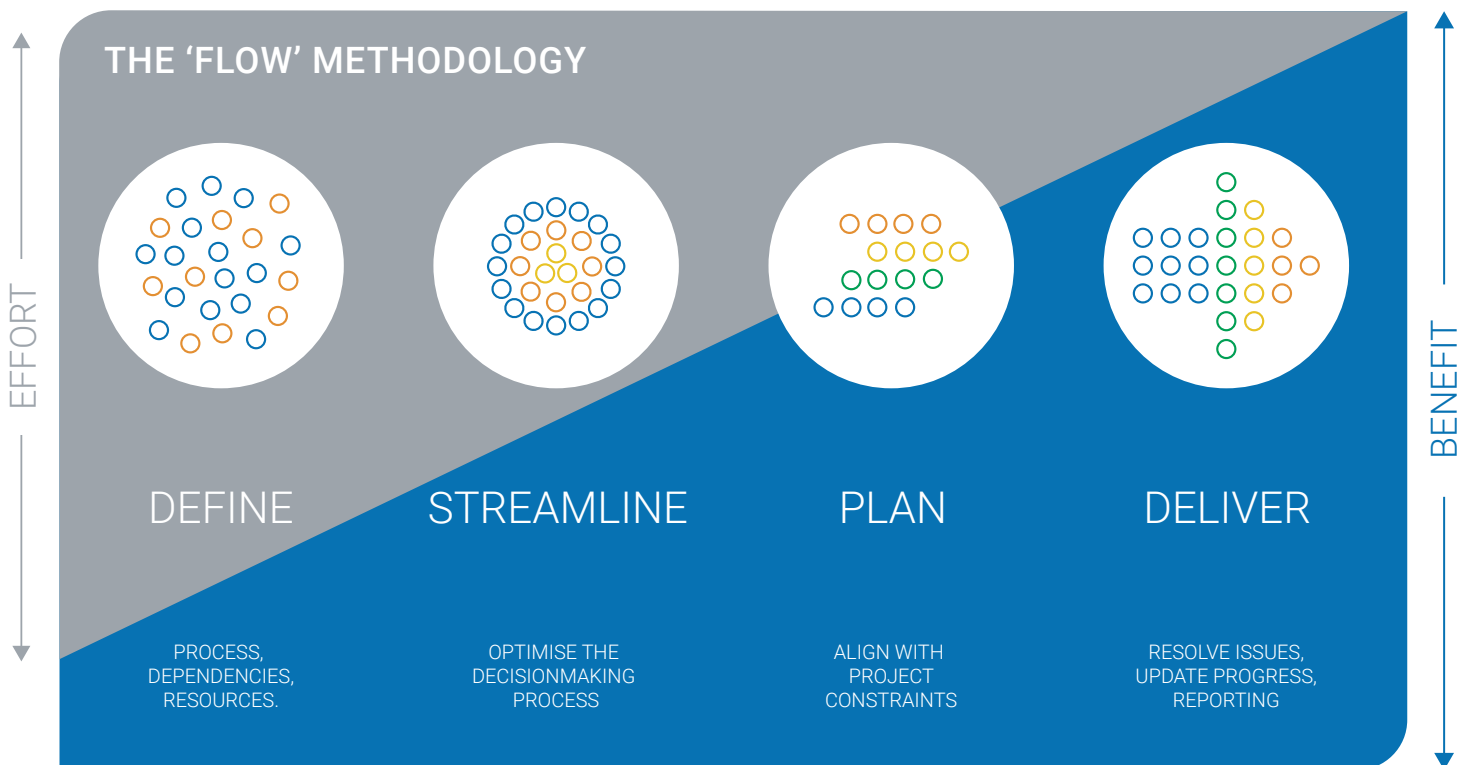

PROJECT CONTROLS

Our Project Controls experience covers PMO design / leadership, Senior Project Controls Management, and functional roles supporting project teams through full lifecycle delivery. Our Project Controls drive certainty.

WORKFLOW DELIVERY

Planning and managing the rate at which design matures, via the flow of information, is enabled by 'Flow' a bespoke solution, combining software and consultancy support, that provides confidence in design delivery
